

CERTI-ETCH

Metal conditioner and degreaser

Cleans and etches metal for better absorption of protective coating

- ▶ Strips rust, corrosion and oxidation
- ▶ Requires no rinsing before painting
- ▶ Effective in hot or cold conditions
- ▶ Conditions metal as it cleans

FEATURES & BENEFITS

EASY TO USE

Clean excess oil and grease from metal by brushing, mop or immersion

PREVENTS FLASH RUSTING

Forms a light phosphorous coating known as phosphating that prevents flash rusting

TIGHTEN LOOSE FITTINGS

Creates tighter joints between pipes and other surfaces by effectively removing calcium, mineral deposits and metal oxides.

CERTI-ETCH

Metal conditioner and degreaser

Areas of Application

- ▶ Metal fabricating shops
- ▶ Painting contractors
- ▶ Garages
- ▶ Machine shops
- ▶ Construction sites

CERTI-ETCH can be use in:

- ▶ Aluminum
- ▶ Steel
- ▶ Brass
- ▶ Iron
- ▶ Copper
- ▶ Bronze
- ▶ Lead

Direction

Brush or Fabric Application

1. Remove excess grease and oil.
2. Dilute 1:3 parts with water.
3. Apply with a mop or brush. Let stand until rust is removed.
4. Rinse with water and allow to dry.
5. Apply a protective coating to the etched metallic surface.

Dip Tank

1. Dilute 1 part **CERTI-ETCH** with 3 parts water in a dip tank.
2. Dip metals coated with grease, grime, rust or corrosion in tank.
3. Lift the clean metals and allow to dry completely.
4. Coat the etched metals with a protective coating such as **DEFY**.

REMARKS:

Do not use on chromium, tin, galvanized or nickel plated metals.
